Me

I have a thing for old languages and relics of our previous programming generations. I blog about mainframes and older languages on <https://kevindurant.be>. My main hobbies aside from programming is playing a board game called Go and SimRacing. I also like to hang out with friends during the weekend.

Skillset

I have 2 years of work-field experience in the following programming and scripting languages.

- HTML5/CSS3
- Javascript ES5/ES6 (Plain, Async/Await, Callbacks), JQuery
- Node.js
- SQL databases, NoSQL MongoDB
- PHP7, Laravel Experience, OpenCart Experience
- Proficient in command-line GIT and Linux commands
- Familiar with most data types.

I have worked with the following languages and platforms during my training and in my leisure time:

- C#, .NET CORE 3, view my project at <https://turn7racing.net>
- Python, Machine Learning
- Azure Cloud, Heroku, VPS and general networking
- Experience with various programming patterns in different languages.

Experience

2018 - 2020

Niwzi Media Group

Customizing OpenCart, Node.js web application (PIM - product information management tool), Ionic-Angular mobile application, data aggregation from multiple suppliers to a webshop products database.

2018 - 2019

IBM Master the Mainframe Contest finisher - Two years in a row

I have participated in IBM's Master the Mainframe contest and documented every challenge on my blog. This challenge required me to work with COBOL, Rexx, Assembler, Java, JCL, DB2, ... and I had to express my creativity in the last challenge.

Education

2014 - 2018

New Media & Communication Technology / Howest, Kortrijk

Learning all about developing applications.

2013 - 2014

PC-Technician and Network Management / Syntra West, Ieper

I learnt the essentials of Linux, Windows, hardware, Windows Server 2008 and networking.

2007 - 2013

Office administration and data management / Heilige Familie, Ieper

Learning the ropes of bookkeeping and warehouse management.
